**When Exposure Occurred:** 12 Hours ago  
**Exposure Reason:** Unintentional- General

## Notes

**Date/Time:** 1/2/2009 10:24:47 PM**Name of Specialist:** Kim Bahma**History:** Steriphene II Disinfectant deoderant  
EPA: 574122

H:  
Caller's sister tried to use the product as a feminine deoderant this morning in error. She was drunk. She had sprayed the product into her vagina. Now the skin is dry and bleeding. It is very painful and there is some numbness. She said that there are pieces of skin flaking off and some of the skin seems to be crisp. The sister has not rinsed the area and as the day goes on it seems to be getting worse. It is bleeding pretty badly and there are a bunch of cracks in the skin. Caller is having difficulty trying to find transportation to a medical facility.

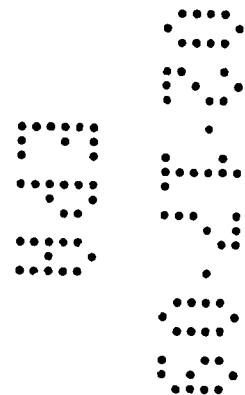

MSDS: Health rating of 1

A:  
-Have your sister sit in a bath with water only to try to rinse and soothe the area.  
-It has a lot of alcohol which can be very irritating and drying to the area.  
-Seek medical attention as soon as possible.
